By Michelle With clear directions, detailed information on where and what to purchase, gorgeously staged photos and TIPS (!!!), deciding which project to begin with will be the most difficult part of this "how to" book. Yes, I am what Shane defines as a "black thumber," but this book is written to inspire even those of us not so gifted. I must add that I love the FEEL of this book. The non-glossy, textured cover and matte pictures only add to the pure beauty of Mr. Powers' passionate creation. I agree with other reviewers ~ a great gift for a new home owner. Thank you, Shane Powers! 6 of 7 people found the following review helpful. I'm going to resell it By lexinpx I think I was looking for more out of this book. It seems like it has a lot of pages for each idea, so fewer ideas total. Also, they are all pretty basic and I think I was really hoping for some more complicated/advanced projects; I wanted something more thought provoking and impressive than what I found. It is

possible I was just disappointed because I don't have a really "cabin-like" style which this book caters to pretty well. My favorite project is the glass framed flowers on the cover, which has fairly light directions (you could find similar directions online for free) and I feel they missed the opportunity to provide more information on which plants to consider based on what grows wild/abundantly in various regions of the country at various times of year. 1 of 1 people found the following review helpful. Beautiful Book By Rose Bring the Outdoors In is a beautifully done book!! I know Shane Powers family personally and his mother has shared his successes and his creativity with us for years. It is an exceptional book. Beautifully done and simple to understand and follow ideas! Well done!! Love seeing a hometown boy gain well deserved success!! Kudos to Shane!! Highly Recommend this publication!!
