Neill Hughes : CAD for the Workshop (Crowood Metalworking Guides) before purchasing it in order to gauge whether or not it would be worth my time, and all praised CAD for the Workshop (Crowood Metalworking Guides):

About the Author Neill Hughes is a professional mechanical engineer with many years of practical industrial experience. He has worked on projects ranging from the design and development of bespoke production-line machinery, to product design for manufacture and prototype development. He currently works both as a freelance designer and as a lecturer in engineering design and computer-aided design.
