Bob Knetzger : Make Fun!: Create Your Own Toys, Games, and Amusements before purchasing it in order to gage whether or not it would be worth my time, and all praised Make Fun!: Create Your Own Toys, Games, and Amusements:

5 of 5 people found the following review helpful. Great Maker Learning and FUN!By StanResJust got my copy and it's great. My 7 year old (girl) couldn't wait to see what was on every page and is already picking activities to do. Truth is I'm learning some new things too. This book is a must for every 'maker kid' and parent who wants to be right there with them!0 of 0 people found the following review helpful. but he has been disappointed that the crafts aren't "real"By CustomerMy son is always getting into one craft or another, but he has been disappointed that the crafts aren't "real". This book has a good mix of real-world toy-making advice as well as a few well thought out projects. I was surprised how easy the cookie cutters were to make and how well the pop-bottle monster worked.3 of 4 people found the following review helpful. Make: FUN!... is simply a Great fun and creative book for all!!By michael hThis is a great book, really for all ages. Terrifically detailed with simple instructions on creating very unique DIY projects

for yourself or with your kids. I found many of these games and toys have an updated nostalgia of toys or projects I had when I was a child and can now be shared with my children and their grandchildren. This book will provide hours, days and months of great activities and projects everyone can easily create, invent and enjoy! Mr. Knetzger has created a real winning formula with all of his toy-making experience and I am so pleased he has shared his ideas and projects with the world!

You don't need to own a factory to make toys. Author and toymaker Bob Knetzger has been making fun stuff all his life with simple technology like vacuum forming and mold-making. In an age where makers are tantalized by the capabilities of 3d printers and other digital fab technology, this book takes you back to old-school hand tools, simple electronics, and working with metal and plastic to make toys every bit as good as those you can find in a big-box store. This book has something for everyone, from a marble maze to a talking booby trap; from custom cookie cutters to an "EZ Make" oven. Discover the basic principles of science, electronics, and engineering through hands-on projects that range from easy to more challenging... and are always fun!

About the Author Bob Knetzger is a designer/inventor/musician whose award-winning toys have been featured on The Tonight Show, Nightline, and Good Morning America.
